terms. The entire subject matter of the paper was referred back to the section for consideration for another year. Congratulate Dr. McKellops,

Attention was called to the fact that the day marked the seventy-hird buthday of the second oldest practitioner in the association, Dr. McKellons of St. Louis, and congratulations were extended him by the

Section 3 reported a paper by Dr. Smith of Buston, which cited the fact of the disappearance of the old theory that the dosing of a patient with medicines would tend to cure all of his ills, and the argued against the use of argenical preparations in the removal of pulp from the seeth. The doctor held that in near every case had results followed such treat
